

# No sink? No time? No problem!

## HurriSept® Antiseptic Hand Gel Health-Care Personnel Handwash with Moisturizers

### Protect yourself and your patients

from the spread of infection, by preventing or reducing the transmission of harmful germs that may cause illness. Occupational exposure to infectious microorganisms, whether spread by contaminated gloves or airborne pathogens, can easily be controlled, even with your busy schedule. When hands are not visibly soiled, an alcohol-based hand rub eliminates transient flora and reduces the risk of health-care-associated infections,\* and is more effective than handwashing with soap and water.\*\*

For routine decontamination –

### Use HurriSept® Antiseptic Hand Gel:

- Before and after direct contact with patients
- Before donning and after removing gloves
- Before and after contact with objects, equipment, materials, devices, or personal protective items in the immediate vicinity of the patient.

## Antiseptic hand hygiene in a hurry.
